

METHOD FOR PRODUCING COATED PAPER WITH PEARLESCENT
EFFECT

ABSTRACT OF THE DISCLOSURE

- 5 A method for producing coated paper with pearlescent effect,
sequentially comprising the following operating steps:
- a deposition, on at least one side (2a) of a paper medium (2), of at
least one layer (3a) of coating;
 - an additional deposition, over the at least one layer (3a) of coating,
10 of a coating (3b) with pearlescent effect by a
rotogravure/flexographic device.
